You need people who can create focused trading strategies with proper risk management & this is what we drive at Checkmate. Our goal is to enhance your trading skills and driving you towards a successful trading career. We at Checkmate believe that every person has a different perspective towards the market and can use his ideas more flexibly and not stick to the old methodologies.

Checkmate Analyst is the next gen analyst to get knowledge of updated Elliott wave Wolfe Price action-technical analysis in Stock market. We aim to foster a community of traders and analysts and to try to spread literacy of varied disciplines through online courses and training programs. New Investors, Retail Traders, Brokers and Sub brokers, Financial Service Professionals shall also benefit from these courses as it shall enhance their knowledge base, understand powerful candlestick patterns, Elliott wave & dynamics of demand and supply and help to predict future price movement.

1) BASIC OF CANDLSTICK PATTERNS

This course is designed based on a new market because after covid-19 the market has totally changed. Fear and Greed are more volatile in the Global and Indian markets. so due to volatility, it is challenging to find Trends or Identify trend reversals. This course will help you to flow with volatility. After completing this course, you will be able to quickly identify the Trend of the market, find the Right Price at Right Time and Trend reversal sign. This Master class of Candlestick Patterns Advance Level is designed for those who want to explore the market and earn a profit.
